

Auto Clutch Cable

Auto clutch cable connects the clutch pedal to the clutch lever, such as to transfer motion from the lever. In this way, drivers can control the lever to engage or disengage the clutch and change gears. We are leading provider of automotive and marine cables in China. Apart from the clutch wires, our company also supplies other cables for speedometer, tachometer, hand brake, accelerator, etc. Besides, we can manufacture auto clutch cables and other cables according to specific drawings or samples provided by clients.

Applications

Our auto clutch cables are mainly applicable for DFM and Sinotruk trucks.

DFM (Xiaobawang 2060 mm)

Sinotruk (1980 mm----1940 mm)

Parameters of Auto Clutch Cables

Auto Clutch Cables	Truck	Sinotruk	Stryr	1980 mm
			Steyr Golden Prince	1940 mm
		DFM	Xiaobawang	2060 mm

We manufacture a wide range of speedo/tacho cables for any make or model of car. If you require a bespoke design for the speedo cable, give us the technical specifications and we will manufacture and dispatch your custom speedo cable as soon as possible. If you are not sure what kind of cable you need, give us a call and we will be happy to help you.
