

HINO Accelerator Cable

HINO accelerator cable is used to connect the accelerator to the throttle pedal. It is made of high carbon steel, pull-push core wire, green HDPE, green PVC, EPDM, etc. We can manufacture specific cable products in compliance with the drawings and samples offered by clients. All our tests accept strict life test, pull-out test, salt spray test and many other tests in special laboratory in our own R&D center.

Apart from HINO accelerator cables, we also supply many other cables for trucks, agricultural vehicles, engineering machinery, marine machinery, etc. Our products are widely sold at home and abroad. If you need a custom cable or have a specific design requirement for your throttle control cable, give us a call and we will be glad to discuss your needs.

We manufacture a wide range of speedo/tacho cables for any make or model of car. If you require a bespoke design for the speedo cable, give us the technical specifications and we will manufacture and dispatch your custom speedo cable as soon as possible. If you are not sure what kind of cable you need, give us a call and we will be happy to help you.
