

LADA Accelerator Cable

Like other flexible shaft products manufactured by us, our LADA accelerator is also widely utilized due to a series of excellent working performance, such as low friction coefficient, high flexibility, strong strength, compact structure, durability, etc. It provides a flexible links between drive efforts to engine operation.

Features

1. LADA accelerator is featured by small friction, short idle stroke, large tension strength and small bending radius.
2. It can be fitted to multifarious types of joints.
3. Adopting internationally advanced technology and our unique stamping technique, our products present many advantages, such as high strength, long working life, dust-prevention, water-tightness, etc.
4. This LADA can work well even under high-heat and moist environments.
5. Its length can reach up to more than 30 meters.
6. We can reproduce any type of generic or custom throttle control cables.

We are dedicated auto/marine cable manufacturer in China. Our products, including throttle cables, clutch cables, control cables, brake cables, etc., are available in various trucks, agricultural vehicles, engineering machinery, motorcycles, etc. These cables are widely sold at home and abroad, and have won good reputations among clients.

We manufacture a wide range of speedo/tacho cables for any make or model of car. If you require a bespoke design for the speedo cable, give us the technical specifications and we will manufacture and dispatch your custom speedo cable as soon as possible. If you are not sure what kind of cable you need, give us a call and we will be happy to help you.
