

## LADA Speedometer Cable

LADA speedometer cable works to connect the speedometer to the transmission; more specifically, it connects the speedometer gauge on the dashboard to the gearbox. When the vehicle moves, the inner cable transmits the rotational speed to the speedometer and provides the driver with an accurate reading of the car's road speed. It is highly appreciated due to durability and strong corrosion resistance.

## Special Speedometer and Tachometer Drive Cables Service

1. Apart from LADA speedometer cables, we are qualified for manufacturing cable products for many other vehicles, no matter they are certain types of or custom built vehicles. Besides, we also supply marine control cables.
2. When ordering specials, it is essential to provide all possible relevant information and a complete sample. Information required includes length (refer instruction below), maker and model of vehicle, type of transmission, maker and model of speedometer/tachometer.

We manufacture a wide range of speedo/tacho cables for any make or model of car. If you require a bespoke design for the speedo cable, give us the technical specifications and we will manufacture and dispatch your custom speedo cable as soon as possible. If you are not sure what kind of cable you need, give us a call and we will be happy to help you.
