

TOYOTA Hand Brake Cable

TOYOTA hand brake cables manufactured by us are comparable in performance with the OEM's products. Hand brake cables are mainly designed to operate the emergency brake located on the rear brakes. This emergency brake cable connects the handbrake lever to the parking brakes, which secures the car on uneven ground and prevents it from rolling downhill. Our TOYOTA hand brake cables are made of high carbon steel, HDPE, green PVC, zinc alloy and EPDM. It accepts special life test, pull-out test, salt spray test and many other inspections in our dedicated laboratory. We can manufacture specific products if clients provide drawings or samples.

Zhejiang Qianyang Flexible Shafts and Tubes Co., Ltd. is an exporter of China (Mainland) engine mounts products. Our products are widely sold in North America, South America, Eastern Europe, Southeast Asia, Eastern Asia, Western Europe, etc. Our cables are designed for trucks, agricultural vehicles, engineering machinery, marine machinery, and so on.

We manufacture a wide range of speedo/tacho cables for any make or model of car. If you require a bespoke design for the speedo cable, give us the technical specifications and we will manufacture and dispatch your custom speedo cable as soon as possible. If you are not sure what kind of cable you need, give us a call and we will be happy to help you.
