

Transmission Shift Cables

Transmission shift cables are one of the most reliable means to transfer motion. Our company supplies a wide range of shifter cables for construction machinery. These cables are available in various mounting configurations, travel or stroke length, overall length and temperature options.

Features

1. The transmission shift cables are made of stainless steel or plated carbon steel.
2. They are of high flexibility and adapt different vehicles in the pull-out force test.
3. With given drawings or samples, we can manufacture the specific cable products.

Applications

Our transmission shift cables are designed for GAC HINO agitating lorries and many other engineering vehicles.
